

SUBSIDIARY LEGISLATION 549.23**QUALITY REQUIRED OF SHELLFISH WATERS
REGULATIONS**

1st March, 2002

LEGAL NOTICE 341 of 2001, as amended by Legal Notice 426 of 2007.

- | | |
|---|---|
| <p>1. The title of these regulations is the Quality required of Shellfish Waters Regulations.</p> | Title. |
| <p>2. (1) These regulations concern the quality of shellfish waters and apply to the coastal and brackish waters designated by the competent authority as needing protection or improvement in order to support shellfish (bivalve and gastropod molluscs) life and growth and thus to contribute to the high quality of shellfish products directly edible by man.</p> <p>(2) The parameters applicable to the waters designated by the competent authority are listed in Annex I.</p> | Scope. |
| <p>3. (1) The competent authority shall for the designated waters, set values for the parameters listed in Annex I, in so far as values are given in column G or column I. The competent authority shall comply with the comments contained in both columns.</p> <p>(2) The competent authority shall not set values less stringent than those given in column I of Annex I and shall endeavour to observe the values in column G, while taking into account the principle set out in regulation 8.</p> <p>(3) For discharges of effluents falling within parameters "organohalogenated substances" and "metals", the emission standards laid down by the competent authority pursuant to the Pollution Caused by Certain Dangerous Substances Discharged into the Aquatic Environment Regulations shall be applied at the same time as the quality objectives and the other obligations arising from these regulations, in particular those relating to sampling.</p> | Competent authority to set values.

S.L. 549.10 |
| <p>4. (1) The competent authority shall designate shellfish waters.</p> <p>(2) The competent authority may subsequently make additional designations.</p> <p>(3) The competent authority may revise the designation of certain waters owing in particular to factors unforeseen at the time of designation, taking into account the principle set out in regulation 8.</p> | Designation of shellfish waters. |
| <p>5. The competent authority shall establish programmes in order to reduce pollution and to ensure that designated waters conform, within six years following designation in accordance with regulation 4, to both the values set by the competent authority in accordance with regulation 3 and the comments contained in columns G and I of Annex I.</p> | Pollution reducing programmes. |

Parametric values.

6. (1) For the purpose of implementing regulation 5, the designated waters shall be deemed to conform to the provisions of these regulations if samples of such waters, taken at the minimum frequency specified in Annex I, at the same sampling point and over a period of twelve months, show that they conform to both the values set by the competent authority in accordance with regulation 3 and the comments contained in columns G and I of Annex I as regards:

- 100% of the samples for the parameters "organohalogenated substances" and "metals"
- 95% of the samples for the parameters "salinity" and "dissolved oxygen"
- 75% of the samples for the other parameters listed in Annex I.

If, in accordance with subregulation (2), the sampling frequency for all the parameters in Annex I except "organohalogenated substances" and "metals" is lower than that indicated in Annex I, the above mentioned values and comments shall be complied with in the case of all the samples.

(2) Instances in which the values set by the competent authority in accordance with regulation 3 or the comments contained in columns G and I of Annex I are not respected shall not be taken into consideration in the calculation of the percentages provided for in subregulation (1) when it is the result of a disaster or an emergency.

Sampling operations.

7. (1) The competent authority shall carry out sampling operations, the minimum frequency of which is laid down in Annex I.

(2) Where the competent authority records that the quality of designated waters is appreciably higher than that which would result from the application of the values set in accordance with regulation 3 and the comments contained in Columns G and I of Annex I, the frequency of the sampling may be reduced. Where there is no pollution and no risk of deterioration in the quality of the waters, the competent authority may decide that no sampling is necessary.

(3) If sampling shows that a value set in accordance with regulation 3 or a comment contained in columns G and I of Annex I is not respected, the competent authority shall establish whether this is the result of chance, a natural phenomenon or pollution, and shall adopt appropriate measures.

(4) The exact sampling point, the distance from this point to the nearest point where pollutants are discharged and the depth at which the samples are to be taken shall be fixed by the competent authority on the basis of local environmental conditions in particular.

(5) The reference methods of analysis to be used for calculating the value of the parameters concerned are set out in Annex I. Laboratories that employ other methods shall ensure that the results obtained are equivalent or comparable to those specified in Annex

I.

- 8.** Implementation of the measures taken pursuant to these regulations may on no account lead, either directly or indirectly, to increased pollution of coastal and brackish waters. Implementation not to lead to increased pollution.
- 9.** The competent authority may at any time set more stringent values for the designated waters than those laid down in these regulations. The competent authority may also lay down provisions relating to other parameters than those provided for in these regulations. More stringent values.
- 10.** The competent authority may derogate from these regulations in the event of exceptional weather or geographical condition Derogation.
- 11.** Such amendments as are necessary for adapting to technical and scientific progress the G values for the parameters and the methods of analysis contained in Annex I shall be adopted by the competent authority. Amendments to be adopted by the competent authority.
- 12.** The competent authority shall publish by notice in the Gazette on a periodic basis information concerning: Periodic information.
- the waters designated in accordance with regulation 4(1) and (2) in summary form,
 - the revision of the designation of certain waters in accordance with regulation 4(3),
 - the provisions laid down in order to establish new parameters in accordance with regulation 9.
- Where the competent authority applies the provisions of regulation 11, it shall forthwith publish by notice in the Gazette reasons and the periods anticipated.
- 13.** Any person shall be guilty of an offence under these offences under these regulations if: Offences under these regulations.
- (a) he fails to comply with any provision of these regulations or with any order lawfully given in terms of any provision of these regulations; or
 - (b) he contravenes any restriction, prohibition or requirement imposed by or under these regulations; or
 - (c) he acts in contravention of any of the provisions of these regulations; or
 - (d) he conspires or attempts, or aids, or abets, any other person by whatever means, including advertising, counselling or procurement to contravene the provisions of these regulations or to fail to comply with any such provisions, including any order lawfully given in terms of any of the provisions of these regulations, or to contravene any restriction, prohibition or requirement imposed by or under the said regulations.

Penalties.
Amended by:
L.N. 426 of 2007.

14. Any person who commits an offence against these regulations shall, on conviction, be liable:

- (a) on a first conviction to a fine (*multa*) of not less than twenty-three thousand and two hundred and ninety-three euro and seventy-three cents (€23,293.73) but not exceeding two hundred and thirty-two thousand and nine hundred and thirty-seven euro and thirty-four cents (€232,937.34);
- (b) on a second or subsequent convictions, to a fine (*multa*) of not less than one hundred and sixteen thousand and four hundred and sixty-eight euro and sixty-seven cents (€116,468.67), but not exceeding four hundred and sixty-five thousand and eight hundred and seventy-four euro and sixty-eight cents (€465,874.68) or to imprisonment for a term not exceeding two years, or to both such fine and imprisonment:

Provided that whenever any person is found guilty of committing an offence under these regulations by means of a vehicle or ship, the owner of the said vehicle or ship, where applicable, is held liable in the same manner and degree:

Provided further that the court shall order any person who has been found guilty of committing an offence against these regulations to pay for the expenses incurred by the competent authority or any public entity or any other persons acting on their behalf involved in the implementation of these regulations, and restitution of the environment as a result of the said offence, and the confiscation of the *corpus delicti*.

Applicability of the
Criminal Code.
Cap. 9.

15. (1) The provisions of articles 23 and 30(1) of the Criminal Code shall, *mutatis mutandis*, apply to proceedings, in respect of offences against these regulations, so however that the disqualification from holding or obtain a licence, permit or authority shall in no case be for less than one year.

Cap. 9.

(2) Notwithstanding the provisions of article 370 of the Criminal Code, proceedings for an offence against these regulations shall be taken before the Court of Magistrates (Malta) or the Court of Magistrates (Gozo), as the case may be, and shall be in accordance with the provisions of the Criminal Code regulating the procedure before the said courts as courts of criminal judicature.

Cap. 9.

(3) Notwithstanding the provisions of the Criminal Code, the Attorney General shall always have a right of appeal to the Court of Criminal Appeal from any judgement given by the Court of Magistrates (Malta) or the Court of Magistrates (Gozo) in respect of proceedings for any offence against these regulations.

Language of
Annexes.

16. The Annexes to these regulations are being published in the English language with the English text of these regulations.

ANNEX 1

QUALITY OF SHELLFISH WATERS

	Parameter	G	I	Reference methods of analysis	Minimum sampling and measuring frequency
1.	pH pH unit		7 - 9	- Electrometry Measured <i>in situ</i> at the time of sampling	Quarterly
2.	Temperature °C	A discharge affecting shellfish waters must not cause the temperature of the waters to exceed by more than 2°C the temperature of waters not so affected		- Thermometry Measured <i>in situ</i> at the time of sampling	Quarterly
3.	Coloration (after filtration) mg Pt/l		A discharge affecting shellfish waters must not cause the colour of the waters after filtration to deviate by more than 10 mg Pt/l from the colour of waters not so affected	- Filter through a 0.45 µm membrane Photometric method, using the platinum/cobalt scale	Quarterly
4.	Suspended solids mg/l		A discharge affecting shellfish waters must not cause the suspended solid content of the waters to exceed by more than 30% the content of waters not so affected	- Filtration through a 0.45 µm membrane, drying at 105°C and weighing - Centrifuging (for at least five minutes, with mean acceleration 2 800 to 3 200g). drying at 105°C and weighing	Quarterly
5.	Salinity ‰	12 to 38‰	- < 40‰ - Discharge affecting shellfish waters must not cause their salinity to exceed by more than 10‰ the salinity of waters not so affected	Conductimetry	Monthly

	Parameter	G	I	Reference methods of analysis	Minimum sampling and measuring frequency
6.	Dissolved oxygen Saturation %	> 80%	- > 70% (average value) - Should an individual measurement indicate a value lower than 70%, measurements shall be repeated - An individual measurement may not indicate a value of less than 60% unless there are no harmful consequences for the development of shellfish colonies	- Winkler's method - Electro-chemical method	Monthly, with a minimum of one sample representative of low oxygen conditions on the day of sampling. However, where major daily variations are suspected, a minimum of two samples in one day shall be taken
7.	Petroleum hydrocarbons		Hydrocarbons must not be present in the shellfish water in such quantities as to: - produce a visible film on the surface of the water and/or a deposit on the shellfish, - have harmful effects on the shellfish	Visual examination	Quarterly
8.	Organohalogenated substances	The concentration of each substance in shellfish flesh must be so limited that it contributes, in accordance with Article 1, to the high quality of shellfish products	The concentration of each substance in the shellfish water or in shellfish flesh must not reach or exceed a level which has harmful effects on the shellfish and larvae	Gas chromatography after extraction with suitable solvents and purification	Half-yearly

	Parameter	G	I	Reference methods of analysis	Minimum sampling and measuring frequency
9.	Metals Silver Ag Arsenic As Cadmium Cd Chromium Cr Copper Cu Mercury Hg Nickel Ni Lead Pb Zinc Zn mg/l	The concentration of each substance in shellfish flesh must be so limited that it contributes in accordance with Article 1, to the high quality of shellfish products	The concentration of each substance in the shellfish water or in the shellfish flesh must not exceed a level which gives rise to harmful effects on the shellfish and their larvae The synergic effects of these metals must be taken into consideration	Spectrometry of atomic absorption preceded where appropriate, by concentration and/or extraction	Half-yearly
10.	Faecal coliforms/ 100 ml	< 300 in the shellfish flesh and intervalvular liquid ⁽¹⁾		Method of dilution with fermentation in liquid substrates in at least three tubes in three dilutions. Subculturing of the positive tubes on a confirmation medium. Count according to MPN (most probable number). Incubation temperature 44°C ± 0.5°C	Quarterly
11.	Substances affecting the taste of the shellfish		Concentration lower than that liable to impair the taste of the shellfish	Examination of the shellfish by tasting where the presence of one of these substances is presumed	
12.	Saxitoxin (produced by dinoflagellates)				

Abbreviations:

G = guide

I = mandatory

(1) However, pending the adoption of a Directive on the protection of consumers of shellfish products, it is essential that this value be observed in waters in which live shellfish directly edible by man.
