L.N. 117 of 2005

PESTICIDES CONTROL ACT,2001
(CAP. 430)

Maximum Residue Levels of Pesticides in Produce of Animal Origin Regulations, 2005

IN exercise of the powers conferred by articles 4 and 5 of the Pesticides Control Act, the Minister for Rural Affairs and the Environment has made the following regulations:-

Title and Scope.

1. (1) These regulations shall be known as Maximum Residue Levels Of Pesticides in Produce of Animal Origin Regulations, 2005.

(2) The scope of these regulations is to transpose the regulations found in European Council Directive 86/363/EEC on the fixing of maximum levels for pesticide residues in and on foodstuffs of animal origin.

Applicability.

2. (1) These regulations shall apply to the foodstuffs of animal origin listed in Schedule I, to the products obtained from them after drying or processing and to the composite foods in which they are included, in so far as they may contain pesticide residues.

(2) These regulations shall also apply to products referred to in sub-regulation (1) intended for export to third countries.

(3) These regulations shall not apply to the products referred to in sub-regulation (1) where it can satisfactorily be proved that they are intended for the manufacture of products other than foodstuffs or animal feed.

Definitions.

3. (1) For the purposes of these regulations the following definitions shall apply:

"pesticide residues" means residues of the pesticides and of their metabolites, and breakdown or reaction products, which are present in or on the products referred to in regulation 2.

"putting into circulation" means any handing over, whether or not for a consideration, of the products referred to in regulation 2;

"MRL" means maximum residue level.

Products not to pose any risks to human health.

4. (1) The Director shall ensure that the products referred to in regulation 2 do not, from the time they are put into circulation, present a danger to human health as a result of the presence of pesticide residues.

(2) The Director may not prohibit or impede the putting into circulation within its territory of the products referred to in regulation 2 on the grounds that they contain pesticide residues if the quantity of such residues does not exceed the maximum levels specified in Schedule II.

Products not to contain pesticide residue levels higher than specified in Schedule II.

5. (1) Notwithstanding regulation 7, the products referred to in regulation 2 shall not contain, from the time they are put into circulation, pesticide residue levels higher than those specified in the list referred to in Schedule II. The list of pesticide residues concerned and their maximum levels shall be established in Schedule II in accordance with the procedure laid down by the Committee assisting the Commission, having regard to current scientific and technical knowledge.

(2) In the case of dried and processed products for which maximum levels are not explicitly fixed in Schedule II, the maximum residue level applicable shall be that laid down in Schedule II, taking into account, respectively, the concentration caused by the drying process or the concentration or dilution caused by processing. A concentration or dilution factor covering the concentration and,or dilution caused by certain drying or processing operations may be determined for certain dried or processed products in accordance with the procedure laid down by the Committee.

(3) In the case of composite foods which contain a mixture of ingredients and for which maximum residue levels are not fixed, the maximum residue levels applied may not exceed the levels laid down in Schedule II, taking into account the relative concentrations of the ingredients in the mixture and also the provisions of sub-regulation (2).

(4) The Director shall ensure, at least by check sampling, compliance with the maximum levels referred to in sub-regulation (1) of this regulation . The necessary inspections and monitoring shall be carried out in accordance with Council Directive 89/397/EEC of 14 June 1989 on the official control of foodstuffs, except for Article 14 thereof, and Council Directive 93/99/EEC of 29 October 1993 on the subject of additional measures concerning the official control of foodstuffs (2), except for Articles 5, 6 and 8 thereof and any other relevant legal provisions for the monitoring of residues in foodstuffs of animal origin.

Provisional maximum level.

6. (1) (a) Where for a product belonging to a group referred to in Schedule I, a provisional maximum residue level application throughout the Community is set by the Commission in accordance with the provisions of Article 4 (1) (f) of Council Directive 91/414/EEC of 15th July, 1991 concerning the placing of plant protection products on the market, that level will be indicated in Schedule II with a reference to that procedure.

(b) For the purposes of this regulation a Member State of origin shall be defined as the Member State in whose territory a product specified in regulation 2 (1) is either legally produced and marketed or put into free circulation and a Member State of destination as the Member State into whose territory such product is introduced and put into circulation for operations other than transit to another Member State or third country.

(2) Malta shall introduce arrangements for establishing maximum residue levels, whether permanent or temporary, for products referred to in regulation 2(1), brought into its territory from a Member State of origin, taking into account good agricultural practice in the Member State of origin, and without prejudice to conditions necessary to protect the health of consumers, in cases where no maximum residue levels have been established for these products in accordance with the provisions of regulations 5 (1) or 6.

(3) Where:

(a) no maximum residue level has been established for a product referred to in regulation 2(1) in accordance with regulations 4 (1) or 5; and

(b) that product, which satisfies the maximum residue levels applied by its Member State of origin, has been subjected in the Member State of destination to measures whose effect is to prohibit or restrict its putting into circulation, on the grounds that the product contains pesticide residue levels in excess of the maximum residue level accepted in the Member State of destination; and

(c) either the Member State of destination has introduced new maximum residue levels or has altered the levels laid down in its legislation, or it has made changes to its controls which are disproportionate and/or discriminatory compared with those for its domestic production, or the maximum residue level applied by the Member State of destination differs substantially from the corresponding levels established by other Member State of destination represents a disproportionate level of protection

compared with the level of protection applied by the Member State to pesticides carrying a similar risk or to similar agricultural products or foodstuffs, the following exceptional provisions shall apply:

(i) the Member State of destination shall communicate the measures adopted to the other Member State concerned and the Commission within 20 days of their application. The notification shall document the facts involved;

(ii) on the basis of the notification referred to in paragraph (a), the two Member States concerned shall contact each other without delay in order to remove, whenever possible, the prohibitive or restrictive effect of the measures adopted by the Member State of destination by means of measures agreed between themġ the Member States shall submit all the requisite information to each other. Within a period of three months of the notification referred to in sub-paragrph (i), the Member States concerned shall inform the Commission of the result of such contacts and in particular the measures they intend to apply, if any, including the maximum residue level they have agreed. The Member State of origin shall inform Malta of the result of such contacts;

(4) Any measure provided for in sub-regulations (2) or (3) shall be taken by Malta with due regard for its obligations under the Treaty establishing the European Community, in particular Articles 30 to 36 thereof.

(5) Council Directive 83/189/EEC of 28 March 1983 laying down a procedure for the provision of information in the field of technical standards and regulations, shall not apply to measures adopted and notified by Malta in accordance with sub-regulation (3) of this regulation.

Products falling within heading No. 04.01 of the Common Customs Tariff.

7. Notwithstanding the provisions of regulation 5, in the case of the products referred to in Schedule I falling within heading No 04.01 of the Common Customs Tariff, the check sampling provided for shall be carried out at the dairy or, if they are not delivered to a dairy, at the point of supply to the consumer. The Director may nevertheless provide also for check sampling from the time these products are first put into circulation.

Report to Commission.

8. The Director shall make a report to the Commission, before the 1st August of each year, on the results of the official checks, the monitoring carried out and the other measures taken pursuant to regulation 4 and, where appropriate, regulation 5, during the previous year.

Methods of sampling and analysis.

9. (1) The methods of sampling and analysis necessary for carrying out the checks, monitoring and other measures provided for in regulation 5 and, where appropriate, regulation 6, shall be determined in accordance with the procedure laid down by the Commitee. The existence of Community analysis methods, to be used in cases of dispute, shall not preclude the use by Malta of other scientifically valid methods capable of achieving comparable results.

(2) Malta shall inform the other Member States and the Commission of the use of other methods pursuant to sub-regulation (1).

(3) Sub-regulations (1) and (2) shall apply without prejudice to Community veterinary inspection measures for checking pesticide residues in products referred to in regulation 2 in particular those adopted pursuant to Directives 64/433/EEC, 72/462/EEC and 85/397/EEC.

Where MRL fixed in Schedule II endangers health.

10. (1) Where Malta, as a result of new information or of a reassessment of existing information considers that a maximum level fixed in Schedule II endangers human or animal health, and therefore requires swift action to be taken, it may temporarily reduce the level in its own territory. In that case, it shall immediately notify the other Member States and the Commission of the measures, attaching a statement of the reasons therefor.

(2) The Commission shall quickly examine the reasons given by Malta referred to and shall consult the Member States within the Standing Committee on Plant Health, hereinafter referred to as "the Committee"; it shall then deliver its opinion forthwith and take the appropriate measures. The Commission shall immediately notify the Council and the Member States of any measures taken. Malta may refer the Commission's measures to the Council within 15 days of such notification. The Council acting by a qualified majority may take a different decision within 15 days of the date on which the matter was referred to it.

Adoption of amendments to Schedules.

11. Without prejudice to the amendments made to the Schedules in accordance with regulations 6 (1)(a) (3) and regulation 10, amendments to the Schedules shall be adopted in accordance with the procedure laid down by the Standing Committee on the Food Chain and Animal Health which assists the Commission, having regard to current scientific and technical knowledge. In particular, when establishing maximum residue levels, account shall be taken of a relevant dietary intake risk assessment and of the number and quality of the data available.

SCHEDULE I

CN code	Description
0201	Meat of bovine animals, fresh or chilled
0202	Meat of bovine animals, frozen
0203	Meat of swine, fresh, chilled or frozen
0204	Meat of sheep or goats, fresh chilled or frozen
0205 00 00	Meat of horses, asses, mules or hinnies, fresh, chilled or frozen
0206	Edible offal of bovine animals, swine, sheep, goats, horses, asses, mules or hinnies, fresh, chilled or frozen
0207	Meat and edible offal, of the poultry of heading No 0105 (fowls of the species *Gallus domesticus*, ducks, geese, turkeys and Guinea fowls), fresh, chilled or frozen
ex 0208	Other meat and edible meat offal of domestic pigeons, domestic rabbits and game, fresh, chilled or frozen
0209 00	Pig fat free of lean meat and poultry fat (not rendered), fresh, chilled, frozen, salted in brine, diced or smoked
0210	Meat and edible meat offal, salted in brine, dried or smoked; edible flours and meals of meat or meat offal
0401	Milk and cream, not concentrated nor containing added sugar or other sweetening matter
0402	Milk and cream, concentrated or containing added sugar or other sweetening matter
0405 00	Butter and other fats and oils derived from milk
0406	Cheese and curd
0407 00	Birds' eggs, in shell, fresh, preserved or cooked
0408	Birds' eggs, not in shell, and egg yolks, fresh, dried, cooked by steaming or by boiling in water, moulded, frozen or otherwise preserved, whether or not containing added sugar or other sweetening matter
1601 00	Sausages and similar products, of meat, meat offal or blood: food preparations based on these products
1602	Other prepared or preserved meat offal or blood

(1) In the case of foodstuffs with a fat content of 10 % or less by weight, the residue is related to the total weight of the boned foodstuff. In such cases, the maximum level is one tenth of the value related to fat content, but must be no less than 0,01 mg/kg.
(2) In determining the residues in raw cow's milk and whole cream cow's milk, a fat content of 4 % by weight should be taken as a basis. For raw milk and whole cream milk of another animal origin the residues are expressed on the basis of the fat.
For the other foodstuffs listed in Annex I under CN codes 0401, 0402, 0405 00, and 0406:
— with a fat content of less than 2 % by weight , the maximum level is taken as half that set for raw milk and whole cream milk,
— with a fat content of 2 % or more by weight, the maximum level is expressed in mg/kg of fat. In such cases, the maximum level is 25 times that set for raw milk and whole cream milk.
(3) For eggs and egg products with a fat content higher than 10 % the maximum level is expressed in mg/kg fat. In this case the maximum level is 10 times higher than the maximum level for fresh eggs.
(4) Footnotes (1), (2) and (3) do not apply in cases where the lower limit of analytical determination is indicated.
(b) Should levels not be adopted by at the latest 1 July 2000 , the following maximum levels shall apply: 0,05 (*).
(5) These MRLs are based on *Codex* MRLs (extraneous residue limits) and do not result from the use of plant protection products.
(6) Based on monitoring data.
(p) Indicates provisional maximum residue level in accordance with Article 4(1)(f) of Directive 91/414/EEC: unless amended, this level will become definitive with effect from 14 July 2007.
(q) Indicates provisional maximum residue level in accordance with Article 4(1)(f) of Directive 91/414/EEC: unless amended, this level will become definitive with effect from 31 December 2007.
