CAP. 427

The Cosmetic Products Regulations 2002

IN exercise of the powers conferred by article 38 of the Product Safety Act, the Minister for Economic Services, on the advice of the Malta Standards Authority, has made the following Regulations:

1.1 The title of these regulations is **The Cosmetic Products Regulations, 2002.** Citation and Commencement.

1.2 These regulations shall come into effect as from 1st July, 2002 provided that:

1.2.1 cosmetic products which do not comply with these Regulations but which comply with the Cosmetic Products Order, 2000 (L.N. 204 of 2000) may continue to be placed on the market until 15th April, 2004.

2.1 These Regulations shall apply to all cosmetic products as defined in regulation 3.1.1. Applicability.

2.2 Without prejudice to paragraph 3.1.1, the products to be considered as cosmetic products within the meaning of this definition are listed in the First Schedule to these Regulations.

3.1 In these Regulations, unless the context otherwise requires, the following definitions shall apply: Interpretation.

3.1.1 "Cosmetic product" shall mean any substance or preparation intended to be placed in contact with the various external parts of the human body (epidermis, hair system, nails, lips and external genital organs) or with the teeth and the mucous membranes of the oral cavity with a view exclusively or mainly to cleaning them, perfuming them, changing their appearance and/or correcting body odours and/or protecting them or keeping them in good condition.

3.1.2 "Directive" shall mean Directive 76/768/EEC of the European Community.

3.1.3 "Competent authority" shall mean the Director of Consumer Affairs, provided that the Director may, in writing, authorise any department or other public entity to act as a competent authority for the purposes of notification under paragraph 7.5.

General
Requirements.

4.1 A cosmetic product put on the market must not cause damage to human health when applied under normal or reasonably foreseeable conditions of use, taking account, in particular of the product's presentation, its labelling, any instructions for its use and disposal as well as any other indication or information provided by the manufacturer or his authorized agent or by any other person responsible for placing the product on the market. The provision of such warnings shall not, in any event, exempt any person from compliance with the other requirements laid down in these Regulations.

Marketing of
Cosmetic Products.

5.1 Only cosmetic products which conform to the provisions of these Regulations and its Schedules may be put on the market.

5.2 Without prejudice to the general obligations laid down in paragraph 4.1, the use in cosmetic products of the following substances is prohibited:

- (a) substances listed in the Second Schedule;
- (b) substances listed in the Third Schedule, beyond the limits and outside the conditions laid down;
- (c) colouring agents other than those listed in the Fourth Schedule, with the exception of cosmetic products containing colouring agents intended solely to colour hair;
- (d) colouring agents listed in the Fourth Schedule, used outside the conditions laid down, with the exception of cosmetic products containing colouring agents intended solely to colour hair;
- (e) preservatives other than those listed in the Sixth Schedule;
- (f) preservatives listed in the Sixth Schedule, beyond the limits and outside the conditions laid down, unless other concentrations are used for specific purposes apparent from the presentation of the product;
- (g) UV filters other than those listed in the Seventh Schedule;

(h) UV filters listed in the Seventh Schedule, beyond the limits and outside the conditions laid down therein;

(i) ingredients or combinations of ingredients tested on animals after 31st December 2002 in order to meet the requirements of these Regulations.

5.3 The presence of traces of the substances listed in the Second Schedule shall be allowed provided that such presence is technically unavoidable in good manufacturing practice and that it conforms with paragraph 4.1.

6.1 Cosmetic products may be marketed only if the container and packaging bear the following information in indelible, easily legible and visible lettering, provided that the information mentioned in point (g) may, however, be indicated on the packaging alone:

Labelling of
Cosmetic Products.

(a) the name or style and the address or registered office of the manufacturer or importer or the person responsible for marketing the cosmetic product who is established within Malta or the European Community. Such information may be abbreviated in so far as the abbreviation makes it generally possible to identify the undertaking. The country of origin shall be specified for goods not manufactured in Malta or in the European Community;

(b) the nominal content at the time of packaging, given by weight or by volume, except in the case of packaging containing less than five grams or five millilitres, free samples and single application packs; for pre-packages normally sold as a number of items, for which details of weight or volume are not significant, the content need not be given provided the number of items appears on the packaging. This information need not be given if the number of items is easy to see from the outside or if the product is normally only sold individually;

(c) the date of minimum durability. The date of minimum durability of a cosmetic product shall be the date until which this product, stored under appropriate conditions, continues to fulfil its initial function and, in particular, remains in conformity with paragraph 4.1.

(i) The date of minimum durability shall be indicated by the words: "Best used before the end of" followed by either:

the date itself, or

details of where the date appears on the packaging.

(ii) If necessary, this information shall be supplemented by an indication of the conditions which must be satisfied in order to guarantee the stated durability.

(iii) The date shall be clearly expressed and shall consist of the month and the year in that order.

(iv) Indication of the date of durability shall not be mandatory for cosmetic products the minimum durability of which exceeds 30 months;

(d) particular precautions to be observed in use, especially those listed in the column "Conditions of use and warnings which must be printed on the label" in the Third, Fourth, Sixth and Seventh Schedules, which must appear on the container and packaging as well as any special precautionary information on cosmetic products for professional use, in particular in hairdressing. Where this is impossible for practical reasons, an enclosed leaflet, label, tape or card must contain that information to which the consumer is referred either by abbreviated information or the symbol given in the Eighth Schedule, which must appear on the container and the packaging;

(e) The batch number of manufacture or the reference for identifying the goods, provided that where this is impossible for practical reasons because the cosmetic products are too small, such information need appear only on the packaging;

(f) the function of the product, unless it is clear from the presentation of the product;

(g) a list of ingredients in descending order of weight at the time they are added. That list shall be preceded by the word "ingredients". Where that is impossible for practical reasons, an enclosed leaflet, label, tape or card must contain the ingredients to which the consumer is referred either by abbreviated information or the symbol given in the Eight Schedule, which must appear on the container and the packaging.

6.2 The particulars provided for in paragraphs 6.1 (d) and (f), if required, must at least be expressed in Maltese or English.

6.3 The following shall not be regarded as ingredients for the purposes of these Regulations:

- impurities in the raw materials used,
- subsidiary technical materials used in the preparation but not present in the final product,
- materials used in strictly necessary quantities as solvents or as carriers for perfume and aromatic compositions.

6.4 Perfume and aromatic compositions and their raw materials shall be referred to by the word “parfum” or “aroma”.

6.5 Ingredients in concentrations of less than 1% may be listed in any order after those in concentrations of more than 1%. Colouring agents may be listed in any order after the other ingredients, in accordance with the colour index number or denomination adopted in the Fourth Schedule.

6.6 For decorative cosmetic products marketed in several colour shades, all colouring agents used in the range may be listed, provided that the list of such ingredients is given in square brackets and preceded by the sign “+/-”.

6.7 An ingredient must be identified by the common name given in the International Nomenclature of Cosmetic Ingredients (INCI) and pursuant to Commission Decision 96/335/EC, as amended, or, where such common name does not exist, by one of the following names:

- (i) its chemical name, or
- (ii) its CTFA name, or
- (iii) its European Pharmacopeia name, or
- (iv) its international non-proprietary name recommended by the World Health Organisation, or
- (v) its EINECS number, or
- (vi) its IUPAC number, or
- (vii) its CAS number, or
- (viii) its colour index number.

6.8 A manufacturer may, for reasons of trade secrecy, not include one or more ingredients on the list mentioned in paragraph 6.1 provided

that the competent authority has granted such an authorisation or is satisfied that an authorisation for such omission has been granted. In all cases, the authorization must be given in accordance with the procedure laid down in Commission Directive 95/17/EC.

6.9 Where it is impracticable, for reasons of size or shape, for the particulars referred to in paragraphs 6.1(d) and 6.1(g) to appear in an enclosed leaflet, those particulars shall appear on a label, tape or card which is enclosed or attached to the cosmetic product.

6.10 In the case of soap, bath balls and other small products where it is impracticable, for reasons of size or shape, for the particulars referred to in paragraph 6.1 (g) to appear on a label, tag, tape or card or in an enclosed leaflet, those particulars shall appear on a notice in immediate proximity to the container in which the cosmetic product is exposed for sale.

6.11 For cosmetic products which are not pre-packaged, are packaged at the point of sale at the purchaser's request, or are pre-packaged for immediate sale, the seller shall make available to the purchaser, on request, a leaflet or similar document, containing the particulars referred to in paragraph 6.1.

6.12 No text, names, trade marks, pictures and figurative or other signs may be used in the labelling, putting up for sale and advertising of cosmetic products so as to imply that these products have characteristics which they do not have. Furthermore, any reference to testing on animals must state clearly whether the tests carried out involved the finished product and/or its ingredients.

Information to be kept accessible.

7.1 The manufacturer or his agent or the person to whose order a cosmetic product is manufactured or the person responsible for placing an imported cosmetic product on the market shall for control purposes keep the following information readily accessible to the competent authority at a specified address:

(a) the qualitative and quantitative composition of the product; in the case of perfume compositions and perfume, the name and code number of the composition and the identity of the supplier;

(b) the physico-chemical and microbiological specifications of the raw materials and the finished product and the purity and microbiological control criteria of the cosmetic product;

(c) the method of manufacture complying with the good manufacturing practice laid down by Community law or, failing that, laid down by Maltese law; the person responsible for manufacture or importation must hold a first degree or equivalent qualification in the field of pharmacy, chemistry, toxicology, dermatology, medicine or a similar discipline;

(d) assessment of the safety for human health of the finished product. To that end the manufacturer shall take into consideration the general toxicological profile of the ingredient, its chemical structure and its level of exposure;

(e) the name and address of the qualified person or persons responsible for the assessment referred to in (d), which person must hold a first degree or equivalent qualification in the field of pharmacy, toxicology, dermatology, medicine or a similar discipline;

(f) existing data on undesirable effects on human health resulting from use of the cosmetic product;

(g) proof of the effect claimed for the cosmetic product, where justified by the nature of the effect or product.

provided that,

7.1.1 if the cosmetic product is imported into Malta from within the European Community or if the cosmetic product has already been placed on the market within the European Community, then the importer may, instead of the information required by paragraph 7.1, provide the competent authority with a declaration, signed by the manufacturer or first importer into the Community, to the effect that the cosmetic product complies with all the requirements of the Directive as well as an indication of the place of initial importation or manufacture within the Community, and that

7.1.2 the qualification requirements for the person responsible for importation laid down by paragraph 7.1(c) shall not apply in the case of cosmetic products imported into Malta from within the European Community or which have already been placed on the market within the European Community.

7.2 The assessment of the safety for human health referred to in paragraph 7.1(d) shall be carried out in accordance with the principle of good laboratory practice laid down in Council Directive 87/18/EEC of 18 December 1986 on the harmonization of laws, regulations and

administrative provisions relating to the application of the principles of good laboratory practice and the verification of their application for tests on chemical substances.

7.3 The information referred to in paragraph 7.1 must be available in Maltese or English or Italian.

7.4 The manufacturer or his agent, or the person to whose order a cosmetic product is manufactured, or the person responsible for placing imported cosmetic products on the market, shall notify the competent authority of the address of the place of manufacture or of importation of the cosmetic products before the latter are placed on the market, provided that such notification shall not be necessary in the case of products imported from within the European Community or which have already been placed on the market within the European Community.

7.5 The person placing a cosmetic product on the market shall ensure that he is in possession, or has access to, appropriate and adequate information on substances used in that product. Such information shall be made available on request to the competent authority or to any other person or body indicated by the competent authority for the purposes of prompt and appropriate medical treatment in the event of difficulties.

7.6 The competent authority or any person or body indicated under paragraph 7.5 shall ensure that any information received is used only for the purposes of such treatment.

Provisional
Prohibition of
Marketing.

8.1 The competent authority may, on the basis of a substantiated justification and on the advice of the Directorate responsible for cosmetic products within the Malta Standards Authority, provisionally prohibit or subject to special conditions the marketing of a cosmetic product which, although complying with the requirements of these Regulations, represents a hazard to health.

8.2 When placing any restriction or ban on the marketing of cosmetic products pursuant to paragraph 8.1, the competent authority shall state precise reasons for any individual measures. Such reasons shall be notified to the party concerned together with particulars of the remedies available to him under Maltese law and of the time limits allowed for the exercise of such remedies.

Methods of
Analysis.

9.1 Where an official test method is given in the Ninth Schedule, then that method shall be used for the official testing of cosmetic products in accordance with the methods described in the Ninth Schedule.

SIXTH SCHEDULE**List of Preservatives which Cosmetic Products may contain**PREAMBLE

1. Preservatives are substances which may be added to cosmetic products for the primary purpose of inhibiting the development of micro-organisms in such products.
2. The substances marked with the symbol (*) may also be added to cosmetic products in concentrations other than those laid down in this Schedule for other specific purposes apparent from the presentation of the products, e.g. as deodorants in soaps or as anti-dandruff agents in shampoos.
3. Other substances used in the formulation of cosmetic products may also have anti-microbial properties and thus help in the preservation of the products, as, for instance, many essential oils and some alcohols. These substances are not included in this Schedule.
4. For the purposes of this list:
 - "Salts" is taken to mean: salts of the cations sodium, potassium, calcium, magnesium, ammonium and ethanolamines; salts of the anions chloride, bromide, sulphate, acetate.
 - "Esters" is taken to mean: esters of methyl, ethyl, propyl, isopropyl, butyl, isobutyl, phenyl.
5. All finished products containing formaldehyde or substances in this Schedule and which release formaldehyde must be labelled with the warning "contains formaldehyde" where the concentration of formaldehyde in the finished product exceeds 0.05%.

SEVENTH SCHEDULE

List of UV Filters which cosmetic products may contain

For the purposes of these Regulations, UV filters are substances which, contained in cosmetic sunscreen preparations, are specifically intended to filter certain UV rays in order to protect the skin from certain harmful effects of these rays.

These UV filters may be added to other cosmetic products within the limits and under the conditions laid down in this Schedule.

Other UV filters used in cosmetic products solely for the purpose of protecting the product against UV rays are not included in this list.
