L.N. 134 of 2008

PESTICIDES CONTROL ACT
(CAP. 430)

Maximum Residue Levels of Pesticides in Produce of Plant Origin (Amendment) Regulations, 2008

IN exercise of the powers conferred by articles 4 and 5 of the Pesticides Control Act, the Minister for Resources and Rural Affairs, in consultation with the Prime Minister and the Minister for Social Policy, has made the following regulations:–

Title and scope.

1. (1) The title of these regulations is the Maximum Residue Levels of Pesticides in Produce of Plant Origin (Amendment) Regulations, 2008 and they shall be read and construed as one with Maximum Residue Levels of Pesticides in Produce of Plant Origin Regulations, 2004, hereinafter referred to as "the principal regulations".

L.N. 199 of 2004.

(2) The scope of these regulations is to transpose Commission Directives 2007/55/EC of 17 September 2007 amending certain Annexes to Council Directives 76/895/EEC, 86/362/EEC, 86/363/EEC and 90/642/EEC as regards maximum residue levels for azinphos-methyl, Commission Directive 2007/57/EC of 17 September 2007 amending certain Annexes to Council Directives 76/895/EEC, 86/362/EEC, 86/363/EEC and 90/642/EEC as regards maximum residue levels for dithiocarbamates and Commission Directive 2007/62/EC of 4 October 2007 amending certain Annexes to Council Directives 86/362/EEC and 90/642/EEC as regards maximum residue levels for bifenazate, pethoxamid, pyrimethanil and rimsulfuron.

Amends Schedule II to the principal regulations.

2. (1) In Schedule II to the principal regulations, there shall be added thereto the entry for Azinphos-methyl as laid down in Schedule I to these regulations.

(2) In Schedule II to the principal regulations, the entries for Mancozeb, Maneb, Metiram, Propineb and Zineb shall be substituted respectively by the entries in Schedule II to these regulations.

(3) In Schedule II to the principal regulations, there shall be added thereto the entries for bifenazate, pethoxamid, pyrimethanil and rimsulfuron as laid down in Schedule III to these regulations.

(1) The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect as single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

(2) In brackets the origin of the residue (ma: maneb; me: metiram; mz: mancozeb; pr: propineb; t: thiram; z: ziram).

(3) As all dithiocarbamates result in the final CS_2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propoineb, ziram and/or thiram is required.
