L.N. 322 of 2011

PRODUCT SAFETY ACT (CAP. 427)

Conformity Assessment of Marine Equipment (Amendment) Regulations, 2011

IN exercise of the powers conferred by articles 38 to 40 of the Product Safety Act, the Prime Minister, acting on the advice of the Malta Competition and Consumer Affairs Authority, has made the following regulations:-

Citation.

1. The title of these regulations is the Conformity Assessment of Marine Equipment (Amendment) Regulations, 2011, and they shall be read and construed as one with the Conformity Assessment of Marine Equipment Regulations, 2009, hereinafter referred to as "the principal regulations".

L.N. 241 of 2009.

Scope and commencement.

2. (1) These regulations transpose Commission Directive 2010/68/EU amending Council Directive 96/98/EC on marine equipment.

(2) These regulations shall enter into force on 10 December 2011.

Amends regulation 5 to the principal regulations.

3. For regulation 5(3)(b) of the principal regulations there shall be substituted the following:

"(b) Where equipment listed as 'new item' in column 1 of Schedule Ia or as having been transferred from Schedule II to Ia was manufactured before 10 December 2011 in accordance with procedures for type-approval already in force before this date, such equipment may be placed on the market and on board a Community ship until 10 December 2013.".

Substitutes Schedules Ia and Ib to the principal regulations.

4. For Schedules Ia and Ib to the principal regulations there shall be substituted the following:

"Schedule Ia
(Based on Annex A.1 of Directive 2009/26/EC)
Equipment for which detailed testing standards already exist in International Instruments

Notes applicable to the whole of Schedule Ia

(1) General: in addition to the testing standards specifically mentioned, a number of provisions, which must be checked during type-examination (type approval) as referred to in the modules for conformity assessment in Schedule II to these regulations, are to be found in the applicable requirements of the international conventions and the relevant resolutions and circulars of the IMO.

(2) Column 1: Where equipment listed as 'new item' in column 1 of Schedule Ia or as having been transferred from Schedule II to Ia was manufactured before the 6th April 2010 in accordance with procedures for type-approval already in force before this date, such equipment may be placed on the market and on board a Community ship until the 6th April 2012.

(2) Column 5: Where IMO Resolutions are cited, only the testing standards contained in relevant parts of the Annexes to the Resolutions are applicable and exclude the provisions of the Resolutions themselves.

(3) Column 5: International conventions and testing standards apply in their up-to-date version. For the purpose of identifying correctly the relevant standards, test reports, certificates of conformity and declarations of conformity shall identify the specific testing standard applied and its version.

(4) Column 5: Where two sets of identifying standards are separated by "or", each set fulfils all the testing requirements to meet IMO Performance Standards; thus testing to one of these sets is sufficient to demonstrate compliance with the requirements of the relevant International Instruments. Conversely, when other separators (comma) are used all the listed references apply.

(5) Column 6: Where module H appears, module H plus design examination certificate is to be understood.

(6) The requirements laid down in this Schedule shall be without prejudice to carriage requirements in the international conventions.

1. Life-saving appliances

Notes applicable to section 1: Life-saving appliances.

Column 4: IMO MSC/Circular 980 should apply except when superseded by the specific instruments referred to in Column 4.

1. Life-saving appliances
